7 December 2020

CIRCULAR

Dear shareholder

The year 2020 passed in overdrive.

Herewith my closing circular for the year.

1. The prospectus with annexures was completed.

It will immediately be lodged for informal approval by CIPC.

Audits should follow early in 2021.

This will put listing and share placement activities back on schedule.

2. A copy of the registered prospectus will then be placed on Cryptique's website (under construction).
3. First contacts have been made for the secondary listings in six (6) African countries as part of Cryptique's Pan-African strategy.
4. The final prospectus allowed for a review of Cryptique's business plan.

It is clear that both the theoretical and technological support bases are strong enough to allow an early application for a NASDAQ listing.

The target price is up to \$1.00 per share.

5. As a result Cryptique is limiting any further share issues to the bare minimum. Only existing agreements will be honoured.
6. The large number of resources assets offered to Cryptique also led to the revival of the strategy of a tandem listing, provisionally named GONDWANA RESOURCES and based on the framework of Equator Mineral Holdings.

More about this in the early 2021 circulars.

7. I wish you all a blessed Christmas.

Regards
Wilhelm Smith
